

FOLDABLE TEXTILE DOORS

Turn your 2-sided roll container into 4-sided units with minimum price and weight increase.

Our unique Textile Doors solution is a flexible, cheaper, ecological and easy-to-handle alternative to wrapping the container with stretch foil or using metal doors.

The Foldable Textile Door is a revolutionary solution which enables securing the goods in the lower half of the container, while handling the goods in the upper part. It also speeds up picking at the warehouse and uploading shelves in your stores.

BENEFITS OF THE TEXTILE DOORS

- Prevents goods from falling out of roll containers
- Offers space benefit in store backrooms and narrow aisles
- Made in EU
- Eliminates the need for stretch foil:
 - reusable environment-friendly solution
 - major money savings on stretch foil
 - saves time compared to wrapping and unwrapping the roll container with stretch foil
 - saves time on handling the used stretch foil for recycle purposes, so your store staff has more time for customers

TECHNICAL DATA/SPECIFICATIONS
